

Trash hunt analysis chart

Congratulations, you are now a trashhunter! A trash hunter is someone who doesn't stand by and watch the world become more and more polluted, instead trash hunters decide to do something about it! What kind of things do you find? What kind of wrappers? Do you see particular bottles? Are there any cigarette butts? It is really good to know what type of rubbish you find, who is responsible for making these things perhaps you even get an idea of who throws it away.....

We can talk to the companies who make this stuff, the people who sell it and the people who litter. You can download up for the Litterati app <https://www.litterati.org/#home> or just collect, count, take photos and share your good actions on social media.

Fill out the sheet below:

Category	Brand (if possible)	Number of items found (tally)
Plastic bottles		
Plastic wrappers		
Glass		
Cans		
Cigarette butts		
Bags		
Bottle caps		
Straws		
Micro plastic (Smaller than 5 mm)		

A note on safety: When you participate in a clean-up make sure you wear protective gear such as gloves, avoid picking up broken glass, watch out for traffic and wear a high viz. Jacket, so traffic can see you. Wash your hands thoroughly afterwards with soap and, very importantly: Have fun!
